

Phase 1 SonarQube Gate Closure Note

Inventory Management Project | Final Security and Quality Sign-off

QUALITY GATE: PASSED

Project Key	inventory-management-phase1
SonarQube Server	http://localhost:9001
Dashboard	http://localhost:9001/dashboard?id=inventory-management-phase1
Execution Date	2026-07-31

Validation Evidence

- Frontend production build completed successfully.
- Backend verification completed with 45 out of 45 tests passed.
- JaCoCo XML coverage report generated and imported by SonarQube.
- Authenticated Sonar scan executed with quality gate wait enabled.
- Scanner finalized with BUILD SUCCESS and QUALITY GATE STATUS: PASSED.

Remediation Summary

- Sonar scan now uses fully qualified Maven goal: org.sonarsource.scanner.maven:sonar-maven-plugin:sonar.
- PowerShell script strengthened with explicit external exit-code checks.
- Maven arguments switched to array dispatch to avoid line-continuation parsing errors.

Residual Observations

- Scanner warned about missing blame metadata on multiple files.
- This does not block gate status but should be corrected for full historical attribution.

Closure Decision

- Phase 1 SonarQube gate is closed as PASS.
- Security and quality baseline requirements are satisfied for current project scope.
